V. Report on Computerization of KMDA Accounts

In order to keep pace with the modern trend in information technology and office automation as well as to update the financial system, the competent authority of KMDA has considered the necessity of computerization in KMDA in the field of finance and some other relevant spheres.

A new system of computerization covering all the Sectoral Accounts is being considered in replacement of the existing one covering five Sectors and Headquarter Finance.

Plans / Projects for the Future

KMDA’s major focus in the coming year would be on revision of Vision 2025 and the sectoral master plans and speedier implementation of the schemes approved under the two missions of JN-NURM. A list of some of the future activities is given below.

• Bus Rapid Transit System (BRTS) along EMBP
• Kolkata Business Park
• Review of LUDCPs

Concluding Remarks

KMDA has been functioning on a wide canvas with hardly any parallel of it in the country. KMDA has been tackling formidable challenges all these preceding 38 years, which has earned KMDA an enviable position in the urban arena. KMDA has worked on projects assisted by international agencies like the World Bank, the Department for International Development (DFID) of UK and the Japan Bank for International Co-operation (JBIC). KMDA has developed a symbiotic working relationship with the constituent units of local self-governments. The two sister concern of KMDA viz. KMW&SA and KIT also assist KMDA in its development initiatives. With long, varied and rich professional and urban management experience attained and with diverse groups of professionals working in tandem, KMDA would continue to play a key role in the urban development scenario of not only KMA but also the State.
